

Synthetic Data Access Request Form

The WA Department of Health has generated several synthetic datasets from real health datasets as an artificial alternative to real-world data. Please ensure you have read the WA Department of Health Synthetic Data User Guide prior to submitting an application to access. The User Guide provides potential users with the necessary information to understand the utility of the department's synthetic data offerings and help determine whether they will be suitable for the potential user's intended purpose.

Response was added on 29-04-2026 12:40.

Organisation Details

Which organisation or agency are you from?

- ☐ WA Department of Health / WA Health
- ☐ A State Department or Agency other than WA Health
- ☐ A Commonwealth Department or Agency
- ☐ A Non-Governmental Organisation
- ☒ Other

If Other, please specify: TAFE

Applicant Details

First Name: Aleksandra Last Name: Schick
Position: Student Phone: 0428150544
Email: 20168053@tafe.wa.edu.au Preferred Contact Method: Email

Synthetic Data Information Release Agreement

DISCLAIMER

Synthetic data may not represent the full complexity and nuances of real-world phenomena and is dependent on the machine learning models and algorithms used to generate it.

INFORMATION REQUESTED

The WA Department of Health agrees to the disclosure of the requested synthetic dataset/s subject to

- **suitability of the requested synthetic dataset/s for the proposed use case**
- **approval by the relevant data custodian and**
- **acceptance of the terms and conditions detailed below.**

I, the requestor, understand the synthetic dataset/s was generated on specific parameters and accepts the limitations outlined in the Department of Health Synthetic Data User Guide.

☒ Yes

I, the requestor, agree not to attempt to:

☒ Yes

a) identify or report on any individual or service provider

b) identify or report on individual diagnosis of a medical condition

c) combine the synthetic dataset/s with another data source unless approval has been granted by the relevant data custodian

d) resynthesise the synthetic dataset/s.

I, the requestor, agree not to use the information for any purpose other than that for which it was originally requested. This includes, but is not limited to, academic research and publication in the public domain such as websites, journals and industry or professional periodicals.

☒ Yes

I, the requestor, agree to maintain the information in a confidential and secure manner by:

☒ Yes

a) storing in the location to which it was originally released.

b) not uploading to any public generative AI tools, which include, but are not limited to, ChatGPT, Python libraries and LlamaIndex, for data analysis or any other purpose.

c) not copying or storing parts or the whole of the released dataset in a location that may be accessible to anyone else.

d) under no circumstances, passing on or divulging the released data to a third party without the prior approval of the relevant data custodian.

e) not leaving printouts of datasets in any form in an area accessible to anyone else.

f) destroying all copies of the information and hard copies at the completion of its use for the intended purpose.

I, the requestor, acknowledge that the information released remains the property of the WA health system.

☒ Yes

I, the requestor, agree that the source of the information will be properly referenced if permission to use the information for a specific output is granted by the WA Department of Health.

☒ Yes

I, the requestor, agree to immediately disclose any information or data breach to the Data Custodian and undertake all reasonable steps to:

☒ Yes

a) contain the information breach;

b) assess the impact of the information breach to determine the extent of the damage and harm caused;

c) take actions to remediate any risk of further harm;

d) review the incident and take preventative actions; and

e) comply with the requirements outlined in the relevant Privacy Impact Assessment(s).

I, the requestor, acknowledge that I have read and agree to the above provisions of the contract.

Application Details

For what purpose do you wish to utilise our synthetic data?

(If more than one use case/project, please submit separate applications for each intended use.)

- ☐ Education and Training
- ☐ Testing and Validation
- ☐ AI and Machine Learning Model Development
- ☒ Data Exploration and Hypothesis Testing
- ☐ Privacy Preserving Data Sharing
- ☐ Other

Data Exploration and Hypothesis Testing:

While real decisions are always made using real data, synthetic data can be a valuable resource, enabling researchers to make progress on their projects, validate their methods, and gain insights into the data they expect to work with.

I acknowledge that synthetic data is not to be used
for publication of research findings.

☒ Yes

Which level of the synthetic data are you requesting?

- ☐ Non-Representative
- ☒ Representative
- ☐ Linked Representative

Representative synthetic dataset

- ☒ EDDC 2022 Representative Synthetic Dataset
- ☐ HMDC 2022 Representative Synthetic Dataset
- ☐ Melanoma 2010-2020 WA Cancer Registry Representative Synthetic Dataset
- ☐ Stomach Cancer 2010-2022 WA Cancer Registry Representative Synthetic Dataset

Project Details

Project Summary/Outline: Provide a lay summary of your project or what you are intending to use the synthetic data for.

(Approximately 50-100 words. Please avoid abbreviations, medical terms and overly complicated terminology.)

My name is Aleksandra Schick, and I am currently studying a Certificate IV in Information Technology (Data Science and AI) at TAFE.

This request is to support a final assessment in Data Wrangling, which requires working with real-world data to demonstrate skills in data preparation, transformation, analysis, and visualisation.

The project will involve exploring patterns within the dataset, identifying trends, and presenting insights through visualisations and written interpretation.

The data will be used strictly for educational purposes only. It will not be shared, and no attempt will be made to identify individuals. All outputs will be aggregated and non-identifiable, and the data will be securely stored and deleted after the project is completed.

The final project presentation is scheduled for May 2026.

My lecturer, Hong, is included and can be contacted if required.

Do you intend to combine the synthetic dataset/s with another data source as part of your project/use case?

- ☐ No
☒ Yes

Please provide a list any datasets you intend to utilise. This will enable the Data Custodian to evaluate the risk of disclosure.

It is the requestors responsibility to ensure the synthetic dataset/s is not combined with any personal level data.

I intend to utilise the EDDC 2022 Representative Synthetic Dataset as the primary dataset for this project. The data will be analysed independently and will not be combined with any personal-level or external datasets. The project will focus on exploratory analysis, including identifying patterns and trends within the dataset for educational purposes.

Please include an expected date of completion for your project/use.

20-05-2026
 (DD-MM-YYYY)

Associate Details

Provide details of any other person who will require access to the synthetic data with this project request

- Any person who will have access to the synthetic data will need to abide by the condition detailed in the Synthetic Data Information Release Agreement.
- Where multiple positions are held across organisations, list only the institution relevant to this application. Full Name Position Email Organisation/

Department

HE number

(if applicable)

Hong Professor hong.fu@nmtafe.wa.edu.au NM TAFE Perth _____

Synthetic Data Management Plan

List all the locations where the synthetic data will be accessed, analysed and stored.
(Include full street address/es where applicable.)

The synthetic data will be accessed and analysed on a personal, password-protected laptop.

The data will be securely stored in a private iCloud account linked to my TAFE student email (20168053@tafe.wa.edu.au). Access to this account is restricted to myself and protected by multi-factor authentication. No data will be stored on shared or public systems.

What computing environment will you be working in?

The data will be analysed in a personal computing environment on a password-protected laptop. Analysis will be conducted locally using Anaconda (Python distribution) and Jupyter Notebook for data preparation, transformation, and visualisation. Data files will be securely stored in a private iCloud account linked to my TAFE student email, protected by multi-factor authentication. No cloud-based processing or external computing services will be used.
(i.e., Personal, Cloud, Client Server etc Please be specific and include which service is being utilised if applicable.)

What measures will be taken to ensure the synthetic data will be safe?
(Provide information on physical and technological security measures where applicable)

The data will be used strictly for educational purposes and will not be shared with any third parties.

Access to the data will be restricted to myself, and all files will be stored in a secure, password-protected environment. No attempt will be made to identify individuals, and all analysis will be conducted at an aggregated level.

The dataset will not be combined with any personal or external datasets.

Upon completion of the project, the data will be securely deleted.

Synthetic Data Outputs

What are the intended outputs for the synthetic data?

- ☐ Report
- ☒ Presentation
- ☒ Data dashboard
- ☐ Other
- ☐ No intended output

How will the information be shared?

(Research findings based on synthetic data are NOT to be published)

- ☒ Shared internally in your agency
- ☐ Shared with other state government agencies
- ☐ Shared publicly or published
- ☐ Shared with commonwealth government agencies

Do you have any attachments to support your application?
